SALE INFORMATION

CASH SALE

All sales are for cash with no cattle loaded out or delivered before payment made.

ANNOUNCEMENTS

All announcements made from the block take precedence over any printed material.

DELIVERY

Free delivery within 150 miles. Any destination over 150 miles will be made at cost, with no fees to exceed \$250 per head.

GROUPS

Heifers will be sorted into groups of 5 or more for sale day. Buyer of each group will have the option to buy more groups within type & kind.

BREEDING GUARANTEE

All females were ultrasounded for pregnancy status on 9/8/2025. All due dates listed in this catalog are an estimate, not a guarantee. All females are guaranteed to be bred. In the event a heifer is not bred, a refund or sale credit will be issued if a satisfactory replacement cannot be found.

LIABILITY

The sale manager, nor any other person connected with the management of the sale, assumes any liability, legal or otherwise

The Angus females are verified by AngusLink for Source & Age, Cattle Care and Handling, Calf Management and Genetic Merit

GENETIC MERIT SCORECARD	
GENETIC MERIT	141
FEEDLOT SCORE	140
GRID SCORE	129

Premium Red Baldy program is designed to take advantage of hybrid vigor by maximizing the best traits of both Red Angus & Hereford. To qualify, the Hereford sires of these females are in the top 50% of the Hereford breed for Baldy Maternal Index (BMI\$).

INTERNET BIDDING

Videos of females selling and live bidding available on

Dear Customers and Friends,

Once again, it's time for our 5th Annual Groendyke Ranch Commercial Bred Heifer "One Ranch, One Brand" Sale. Please join us on Friday November 7th at 1pm at the ranch. This year's offering will consist of approx. 327 head of bred females along with 34 fall pairs. Cattle will be available for viewing the day before at the ranch. A complimentary lunch will be served on sale day courtesy of Livestock Nutrition Center. As everyone well knows, in today's cattle industry with soaring input/operating costs, it pays to buy cattle that have been bred with one main goal in mind-efficiency. At the ranch these cattle are bred and raised to be long lasting, sustainable, efficient cows. We do that by purchasing top quality bulls from leading seedstock producers in the Angus, Hereford and Red Angus breeds. These producers utilize genomically enhanced EPD's thru DNA testing and are progressive with trends in the industry. We take those bulls and mate them to different groups of cows with specific goals in mind whether it be the feeder calf, replacement females, stockers, etc. In the case of these heifers, they are out of and bred back to specific bulls that are heavy on maternal traits but with some growth and carcass traits as well, setting them up to be quality brood cows for years to come. These heifers go thru rigorous culling from weaning to breeding to ensure sound, functional females.

We have complete production records on all the heifers, their dams and in some cases their granddams that gives us the ability to make culling decisions based on productivity, longevity, fertility, sustainability and efficiency. These heifers are not "bought" or "put together" females for the purpose of this sale, they were born, raised and bred here on the ranch.

We all hear and see the reports of continued record low cattle inventory, supply and demand at its simplest. It all starts with the cow, without her there are no stockers, feeders, replacements, feedlot cattle. To get to the cow you begin with a bred heifer. So, if you're going to make the investment to buy, why not buy something that to the best of our ability, is the most complete package to move forward. We have taken the guess work out of it to offer you the most predictable investment you can find anywhere in the industry.

Please feel free to call or come by the ranch any time before the sale, I would love to show you the operation and the heifers out in the pasture and answer any questions you may have.

Sincerely,
Paul J. Koffskey - (580) 541-1315
